Summary

Full-stack engineer with elite problem-solving ability (LeetCode 1792, 850+ problems) and hands-on experience building real-time, production-grade systems. Strong in designing secure backend services with Spring Boot and delivering low-latency collaborative applications using React, WebSockets, and WebRTC.

Education

Indian Institute of Information Technology (IIIT), Tiruchirappalli
Bachelor of Technology in Computer Science and Engineering (CGPA: 7.6)

Aug 2023 – May 2027
Tamil Nadu, India

Technical Skills

Languages: Java (Advanced), C++, JavaScript (ES6+), SQL (PostgreSQL), HTML/CSS, Python
Backend: Spring Boot, Spring Security, WebSocket (STOMP/SockJS), REST APIs
Frontend: React.js, Redux Toolkit, Tailwind CSS, Monaco Editor, WebRTC, Material UI, Axios
Tools & Platforms: Git/GitHub, Postman, Linux, Vercel, Render, Judge0 API, Maven

Projects

LiveInterview — Real-Time Collaborative Interview Platform | Code | Live

Jan 2026 – March 2026

Tech Stack: Spring Boot, React.js, Postgre SQL, WebSockets (STOMP/SockJS), WebRTC, Monaco Editor, Judge0

- Designed and developed a real-time technical interview platform enabling live coding and video communication between interviewers and candidates.
- Implemented low-latency collaborative code editing using WebSockets with role-based editing constraints to synchronize code and questions.
- Integrated WebRTC for peer-to-peer video/audio communication and Monaco Editor to provide a browser-based IDE experience.
- Built a secure code execution pipeline by proxying Judge0 requests through backend services to prevent client-side API key exposure.
- Implemented interview integrity signals including ESC detection, copy/paste monitoring, and tab-switch tracking to improve interview security.

Sangraj Rentals — Full-Stack Vehicle Booking System | Code | Live

Jul 2025 – Nov 2025

Tech Stack: Spring Boot, React.js, Postgre SQL

- Developed a full-stack car rental platform supporting **hourly-based availability checks** and dynamic booking schedules.
- Implemented secure **Role-Based Access Control (RBAC)** where admin accounts are initialized via backend logic while users register via email verification.
- Designed a fleet management system allowing admins to manage vehicles, track booking history, and monitor **total revenue analytics**.
- Secured REST APIs using **Spring Security and JWT authentication** to protect booking, review, and contact endpoints.
- Built separate **Admin and User dashboards** enabling booking management, cancellation workflows, and real-time profile tracking.

Programming Achievements

Flipkart Grid 7.0 Semi-Finalist: Solved complex engineering challenges to reach the National Semi-Finals. (Certificate)

Problem Solving: Solved **1600+** total problems across various competitive platforms.

LeetCode: Max Rating **1792**; Solved **850+** problems; Top 3% in Weekly Contest 445 (Rank 702/25k).

CodeChef: **3-Star** Coder (Max Rating 1672); Global Rank **203** in Starters 179 (Div 3).

Codeforces: Solved **200+** problems focusing on constructive algorithms and implementation.

GeeksforGeeks: Solved **200+** problems covering core CS fundamentals (Trees, Graphs, DP).

Relevant Coursework

Core: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems

Advanced: Computer Networks, Compiler Design, Software Engineering

Extracurriculars

Stanford Machine Learning: Certified in Supervised Learning and Advanced Neural Networks via Coursera (Supervised ML, Advanced Neural Networks).

Sports MVP: 3-time College Champion in **100m Sprint**; Best Player award in Inter-College Football & Kho-Kho.
