Portfolio: tanishportfolio29.netlify.app

Full-stack Engineer (Java, Spring Boot, React.js) building production AI/RAG apps with LangChain & LLM agents.

EDUCATION

- **Indian Institute of Information Technology (IIIT), Tiruchirappalli** **Aug 2023 – May 2027**
Bachelor of Technology in Computer Science and Engineering (CGPA: 7.6/10) *Tamil Nadu, India*

EXPERIENCE

- **47Billion** **May 2026 – July 2026**
Software Development Engineer Intern *Indore, India*
 - Engineered a RAG-based QA Bot utilizing **LangChain**, driving an 80% reduction in manual query resolution time and achieving 90% retrieval accuracy for critical internal workflows.
 - Architected robust data pipelines using **vector embeddings** to process gigabytes of textual data, delivering scalable contextual awareness to LLMs across complex state machines.
 - Optimized model performance and reasoning capabilities through advanced **prompt engineering**, successfully decreasing autonomous task hallucination rates by 90%.

TECHNICAL SKILLS

- **Backend & Microservices:** Spring Boot, Spring Security, Node.js, Express, WebSocket (STOMP), REST APIs
AI & Data: LangChain, AI Agents, RAG, Prompt Engineering, Vector Embeddings
Languages: Java, C++, JavaScript (ES6+), Python, SQL (PostgreSQL), HTML/CSS
Infrastructure & Tools: Git/GitHub, Linux, Judge0, Maven, Postman
Frontend: React.js, Redux Toolkit, Tailwind CSS, Monaco Editor, WebRTC

PROJECTS

- **LiveInterview — AI-Powered Real-Time Interview Platform** | [Code](#) | [Live](#) *Jan 2026 – Present*
 - *Tech Stack:* Spring Boot, React.js, PostgreSQL, WebSockets, WebRTC, Judge0, Python, FastAPI, LiveKit Agents, LLM (Gemini)
 - Built a real-time collaborative technical interview platform and extended it with an autonomous **AI voice interviewer agent** for resume-grounded mock interviews (Python worker via LiveKit Agents SDK, integrated with the Spring Boot backend through a service-to-service API layer).
 - Designed an adaptive AI conversation pipeline (VAD → STT → LLM reasoning → TTS) with tool-calling for dynamic actions and a bounded sliding-window memory with rolling summarization, sustaining long, context-aware conversations.
 - Implemented low-latency code synchronization via **WebSockets** with role-based event broadcasting, and secured remote code execution by proxying **Judge0** API requests through the Spring Boot backend.
 - Added real-time interview integrity monitors (ESC key detection, clipboard tracking) alongside AI safety controls (resume-to-role relevance checks, content-moderation warnings, session lifecycle limits) to keep sessions secure and well-behaved.
 - Built a live coding round (Judge0) into the voice interview via LiveKit's data channel, with post-session LLM-generated feedback reports covering technical depth and resume-answer consistency.
- **Sangraj Rentals — Highly-Available Booking Engine** | [Code](#) | [Live](#) *Jul 2025 – Nov 2025*
 - *Tech Stack:* Spring Boot, React.js, PostgreSQL, Spring Security
 - Built a full-stack vehicle booking engine, optimizing complex relational database states to support dynamic hourly scheduling and real-time availability tracking.
 - Enforced strict transactional isolation in **PostgreSQL**, eliminating double-booking race conditions during high-traffic concurrent requests.
 - Integrated Role-Based Access Control (**RBAC**) using **Spring Security and JWT**, establishing rigorous authorization protocols for administrative fleet workflows.

ACHIEVEMENTS

- **Flipkart Grid 7.0 Semi-Finalist:** Advanced to National Semi-Finals by engineering optimal solutions for complex algorithmic problem statements. ([Certificate](#))
- **LeetCode:** Achieved a maximum rating of 1792; Top 3% globally in Weekly Contest 445 (Rank 702/25k).
- **CodeChef:** Attained 3-Star coder status (Max Rating 1672); secured Global Rank 203 in Starters 179 (Div 3).

CERTIFICATIONS

- **Stanford Machine Learning Specialization:** Certified in Supervised Learning & Advanced Neural Networks via Coursera ([Cert 1](#), [Cert 2](#)).
